

Copeland™ Scroll Compressor Training Kit

*Maximize the learning
experience with accessible
hands-on training*

The Copeland™ Scroll Compressor Training Kit is one of our newly developed training aids designed for your classroom. Our Compressor Training Kit offers a rare inside look inside the heart of any HVACR system and helps teach the fundamentals of scroll compression technology. The kit features a torn-down scroll compressor straight from our labs that can be put together, taken apart, and packed away into the traveling case for easy access. We've also included custom safety equipment, supplemental learning materials, and interactive digital content to provide a comprehensive educational experience.

What's Included?

- Copeland Scroll Compressor
- Safety Gloves
- Safety Glasses
- Instruction Manual
- QR Resources Card
- Scroll Visualizers

Education You Can Build On

Affordable, accessible & environmentally friendly

In alignment with Emerson's ongoing effort to support skilled trades education across the nation, our training kits are specifically designed to be affordable and accessible to all. Each scroll compressor is repurposed as a training tool for students. We minimize the amount of paper waste created by replacing copies of the educational content with environmentally sustainable digital versions. The result is a high quality, low cost training solution to further HVACR education across the industry.

How to Order:

Please complete the order form below and fax it to **(937) 913-5718**, email to ColdChain.EducationalServices@emerson.com, or order by phone at (800) 748-2779.

Cost: \$550 per kit (plus shipping per kit).

Delivery: Please allow 2 - 6 weeks from order placement for delivery.
