

Marble Tops

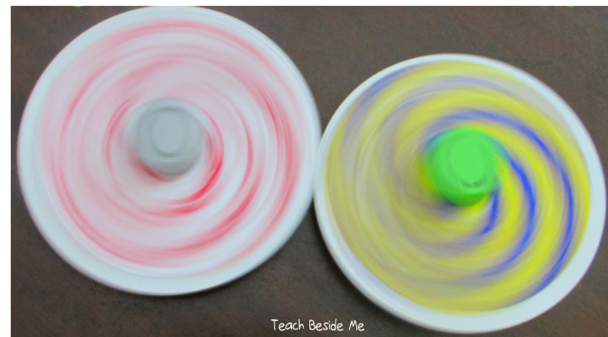

Materials:

- Super Glue
- CD Disc
- Marbles
- Markers

Instructions:

1. Color your CD with Sharpie. Kids can do whatever design they like. Doing a spiral from the center out looks super cool when spinning.
2. Glue your marble onto the center of the CD. The marble nests in the hole perfectly. You want the image you'd like to see on top facing up as you glue the marble down.
3. Spin Away!

The Science:

Spinning the top creates a centrifugal force that allows the CD to move. The size of the CD pushes the force to the outside, which allows the top to spin for a longer time.
